

EB and EP Product Brief

HS Series Evaluation Boards and Reference Platform

Evaluation Boards

- Designed to work with all Superior Sensor Technology HS Series Products:
 - HS110, HS120, HS160, HS210
- Four evaluation board options available with different numbers of DIP switches, push buttons, voltage and current output (see eval board options below)
- Package contents
 - Evaluation board
 - USB to I²C adapter
 - 1 unit each of HS110, HS120, HS160, HS210
 - USB Drive with software and documentation

Evaluation Board Options

- EB-14S2B-V3W
 - 14 DIP switches
 - 2 push buttons
 - Voltage out
 - 3-Wire current output
- EB-8S1B-V3W
 - 8 DIP switches
 - 1 push button
 - Voltage out
 - 3-Wire current output

Evaluation Board Options (cont'd)

- EB-8S1B-2W
 - 8 DIP switches
 - 1 push button
 - 2-Wire current output
- EB-0S1B-V2W
 - 0 DIP switches
 - 1 push button
 - Voltage out
 - 2-Wire current output

Reference Platform

- A complete solution that you can take to production to quickly bring your product to market
- Package contents
 - Evaluation board
 - USB to I²C adapter
 - 1 unit each of HS110, HS120, HS160, HS210
 - USB Drive with software and documentation

Reference Platform Ordering

- EP-8S1B-V2W
 - 8 DIP switches
 - 1 push button
 - Voltage out
 - 2-Wire current output
